Procedure to Install SentinelOne EDR in Windows

- 1. Please **uninstall any Antivirus/EDR** (*except for SentinelOne*) already installed like McAfee, Trend Micro, Symantec, Quick Heal, Avast, eScan, etc. and restart the system. It is extremely important as multiple AV/EDR will slow the system down and may even crash it.
- Download the EDR for Windows from the following link, 64bit Windows: <u>https://vpn.nic.in/epp64.zip</u> 32bit Windows: <u>https://vpn.nic.in/epp32.zip</u>
- 3. Extract the downloaded file.
