Open Microsoft Teams Cancel

2. Click cancel

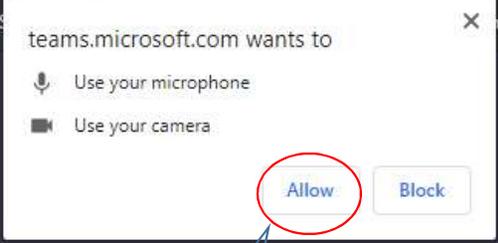

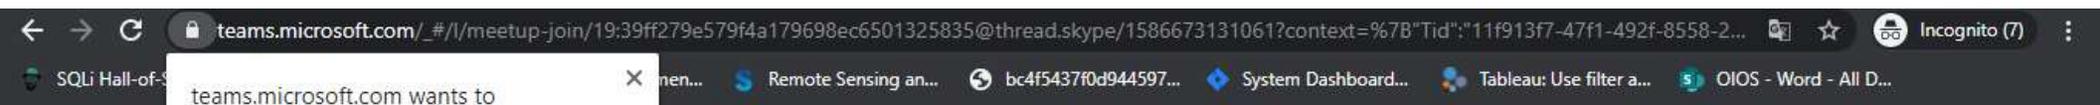

Experience the best of Teams meetings with the desktop app

Download the Windows app Join on the web instead

3. Click Join on the web instead

Already have the Teams app? Launch it now

3.5. Click "Allow", if prompted by the browser

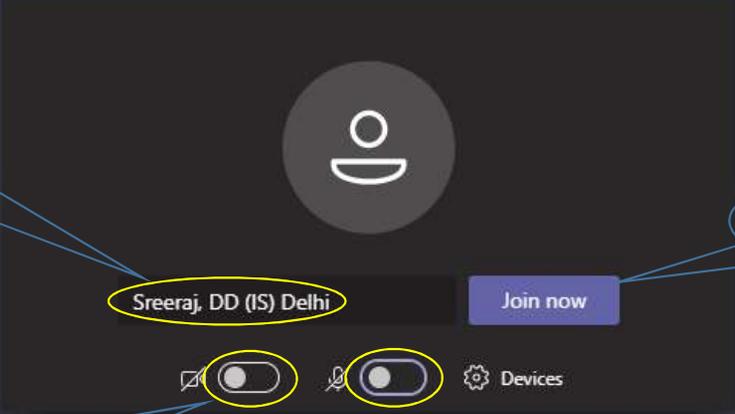

Select Allow to let Microsoft Teams use your mic and camera for calls and meetings on this browser.

When you do, we'll turn your devices on for a moment to set them up.

For a better experience download the desktop app.

Choose your audio and video settings for
Meeting now

4. Enter First name, Designation (in short), Location

The interface shows a dark grey panel with a white person icon at the top. Below the icon is a text input field containing "Sreeraj, DD (IS) Delhi". To the right of the input field is a blue "Join now" button. Below the input field and button are two toggle switches: the first is for video (with a camera icon) and the second is for microphone (with a microphone icon). Both toggle switches are currently turned off. To the right of the microphone toggle is a gear icon labeled "Devices".

6. Click Join Now

5. Make sure video and Microphone are switched off (left as in the picture)

Someone in the meeting should let you in soon

6. Wait

The image shows a dark-themed pre-join screen in Microsoft Teams. At the top center, a white message reads "Someone in the meeting should let you in soon". Below this is a large circular placeholder for a user's profile picture, containing a white silhouette of a person. At the bottom of the screen, there are three controls: a microphone icon with a toggle switch, a camera icon with a toggle switch, and a gear icon labeled "Devices".

7. Switch on the Camera and Microphone, if you want to speak. Switch these settings off again, once done speaking.

8. End the call after the meeting is concluded.
