Note: 1. The comparison of rail fares with bus fares has been done for pairs of stations to which direct rail as well as bus services are available. The fares have been compared separately ordinary and express services. In some cases where express bus services were not available, the Railways Mail/Express fares have been compared with ordinary bus fares for the purpose of calculation of financial impact.

2. The number of passengers traveled by rail in II class ordinary and Mail/Express trains to the selected pairs of stations in the month of March 2004 were taken to assess the financial impact.
