CAG's recommendation for the State Government to review the PSUs

Shillong, November 14: The Comptroller Auditor General of India (CAG), had given a recommendation to the State Government to review the working of the loss making Public Sector Undertaking (PSU).

As per the CAG's report of the State Finance Audit Report of the year ending 31 March 2019, the State Government had made investment of 2,638.43 crore in PSUs including in three Corporation amounting to 2245.06 crore, eight Government Companies 272.67 crore and 1448 numbers of Cooperative Banks and Societies 112.70 crore.

From the three Corporations, the biggest chunk of investment amounting to 339.54 crore was invested on the Meghalaya Energy Corporation Limited (MeECL) between 2013-2019 which has a working loss of 1,836.03 crore till 2016-2017, stated the report.

From the 272.67 crore invested on 7 Government Companies with a working loss of 287.18 crore.

In addition, the Government had invested 112.70 crore on Co-operative banks and Societies operating with working loss 8.09 crore till 31 March 2010.

CAG also stated that these Co-operative Banks/Societies did not furnished their working result while making remark that this is a serious matter since it may indicate that there may be irregularities.

Government's loss from investment on these Corporation, Companies, Co-operative Banks/Societies was less than one per cent between 2014-2019. However it stated that the Government had paid the interest from borrowings at the rate of 6.22 % to 6.70% between the years 2014-2019.

While stressing on the need to examine for reviewing the working of these PSUs, CAG stated that the MFRBM Act, 2006 provides that the State Government may review the working of the PSUs including restructuring of those that are absolutely essential and close those which are no longer viable.
