Part A: Methodology adopted for the assessment of Fiscal Position

The norms/ceilings prescribed by the TFC for selected fiscal variable along with its projections for a set of fiscal aggregates and the commitments/projections made by the State Governments in their Fiscal Responsibility Acts and in other Statements required to be laid in the legislature under the Act (Part B of Appendix 1.2) are used to make qualitative assessment of the trends and pattern of major fiscal aggregates. Assuming that GSDP is the good indicator of the performance of the State's economy, major fiscal aggregates like tax and non-tax revenue, revenue and capital expenditure, internal debt and revenue and fiscal deficits have been presented as percentage to the Gross State Domestic Product (GSDP) at current market prices. The buoyancy coefficients for relevant fiscal variables with reference to the base represented by GSDP have also been worked out to assess as to whether the mobilization of resources, pattern of expenditure etc., are keeping pace with the change in the base or these fiscal aggregates are also affected by factors other than GSDP.

The trends in GSDP for the last five years are indicated below:

Trends in Gross State Domestic Product (GSDP)
