## **Glossary of Terms and abbreviations**

Access Service  Access Service is the collection, carriage, transmission and delivery of voir or non-voice messages over Licensee's network by deploying circuit and/or switched equipment  Adjusted Gross Revenue - AGR is Gross revenue reduced by permissible dec (i.e. PSTN related call charges paid to other telecom service providers for car calls (IUC)/Roaming and service/sales tax actually paid to the Government, as license agreement  Basic Services  A Service Provider must offer customers the ability to place and receive voir calls over all distances utilizing the public switched telephone network or suntwork  Basic Service Operators - They were permitted to offer "limited-mobility" over Wireless Local Loop (WLL (M)) using CDMA technology in their coverage of CAG Comptroller and Auditor General of India  Call Charges  Call charges are variable and are used to pay for the cost of the equipment to call from the caller's exchange to the recipient's exchange.  Captex Capital Expenditure  Provision of wired or wireless facilities to originate, terminate or transcharging for interconnection, settlement or termination of domestic or intercalls, charging for jointly used facilities including pole attachments, charging exclusive use of circuits, a leased circuit or a dedicated link including a speech data circuit or a telegraph circuit  COTA Controller of Communication Accounts  Code Division Multiple Access (CDMA) is a technology for providing viservices.  Cellular Mobile Telephone Service - It is a type of short-wave analog or telecommunication service in which a subscriber has a wireless connection mobile phone to a relatively nearby transmitter. The transmitter's span of covalled a cell. As the cellular telephone user moves from one cell or area of covanither, the telephone is effectively passed on to the local cell transmitter.  Department of Telecommunications  on the local cert transmission of data  Provision of access to wired or wireless facilities and services specifically deforeflicient transmission of data	
(i.e. PSTN related call charges paid to other telecom service providers for car calls (IUC)Roaming and service/sales tax actually paid to the Government, as license agreement  3 Basic Services  A Service Provider must offer customers the ability to place and receive voi calls over all distances utilizing the public switched telephone network or su network  4 BSOs  Basic Service Operators - They were permitted to offer "limited-mobility" sover Wireless Local Loop (WLL(M)) using CDMA technology in their coverage of the coal Comptroller and Auditor General of India  CAG  Comptroller and Auditor General of India  Call Charges  Call charges are variable and are used to pay for the cost of the equipment to call from the caller's exchange to the recipient's exchange.  R CAPEX  Capital Expenditure  Provision of wired or wireless facilities to originate, terminate or trans charging for interconnection, settlement or termination of domestic or inter calls, charging for jointly used facilities including pole attachments, charging exclusive use of circuits, a leased circuit or a dedicated link including a speech data circuit or a telegraph circuit  CCA  Controller of Communication Accounts  Call Man Code Division Multiple Access (CDMA) is a technology for providing varieties.  CMTS  Cellular Mobile Telephone Service - It is a type of short-wave analog or telecommunication service in which a subscriber has a wireless connection mobile phone to a relatively nearby transmitter. The transmitter's span of coverance of the communication of a call data call and the cellular telephone user moves from one cell or area of coverance of the communication of the communication of the controller of the communication of the controller of the communication of the controller	
calls over all distances utilizing the public switched telephone network or sunctwork  BSOS  Basic Service Operators - They were permitted to offer "limited-mobility" over Wireless Local Loop (WLL (M)) using CDMA technology in their coverage of the cover Wireless Local Loop (WLL (M)) using CDMA technology in their coverage of the co	or carriage of
over Wireless Local Loop (WLL (M)) using CDMA technology in their coverage  Broadband wireless access  CAG Comptroller and Auditor General of India  Call Charges Call charges are variable and are used to pay for the cost of the equipment to call from the caller's exchange to the recipient's exchange.  CAPEX Capital Expenditure  Provision of wired or wireless facilities to originate, terminate or trans charging for interconnection, settlement or termination of domestic or intercalls, charging for jointly used facilities including pole attachments, charging exclusive use of circuits, a leased circuit or a dedicated link including a speech data circuit or a telegraph circuit  CCA Controller of Communication Accounts  CDMA Code Division Multiple Access (CDMA) is a technology for providing viservices.  CMTS Cellular Mobile Telephone Service - It is a type of short-wave analog or telecommunication service in which a subscriber has a wireless connection mobile phone to a relatively nearby transmitter. The transmitter's span of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled a cell. As the cellular telephone user moves from one cell or area of coveralled accelled to a cell a cell. As the cellular telephone user moves from one cell or area of coveralled telephon	
Call Charges Call charges are variable and are used to pay for the cost of the equipment to call from the caller's exchange to the recipient's exchange.  Capital Expenditure  Provision of wired or wireless facilities to originate, terminate or transcharging for interconnection, settlement or termination of domestic or intercalls, charging for jointly used facilities including pole attachments, charging exclusive use of circuits, a leased circuit or a dedicated link including a speech data circuit or a telegraph circuit  CCA Controller of Communication Accounts  Code Division Multiple Access (CDMA) is a technology for providing varieties.  Cellular Mobile Telephone Service - It is a type of short-wave analog or telecommunication service in which a subscriber has a wireless connection mobile phone to a relatively nearby transmitter. The transmitter's span of coverance called a cell. As the cellular telephone user moves from one cell or area of coverance another, the telephone is effectively passed on to the local cell transmitter.  Data Service Provision of access to wired or wireless facilities and services specifically defor efficient transmission of data  DoT Department of Telecommunications  Department of Telecommunications  One time non-refundable Entry Fee fixed by DoT has to be paid by the Licens to signing of the License agreement.  Fixed license fee regime Prixed license fee process and were to pay to the Government a fixed amount of annual fee, agreed during the National Telecom Policy-1994 regime, licensees were selected the bidding process and were to pay to the Government a fixed amount of annual fee, agreed during the bidding process.  Refor  GR - The Gross Revenue shall be inclusive of installation charges, late fee proceeds of handsets (or any other terminal equipment etc.), revenue on of interest, dividend, value added services, supplementary services, ac interconnection charges, roaming charges, revenue from permissible sha infrastructure and any other miscellaneous revenue, without any set-off

item of expense, etc.	e on account s, access or e sharing of

21	GSM	Global System for Mobile communication is a technology for providing wireless services.
22	ILD	International Long Distance - The ILD Service is basically a network carriage service (also called Bearer) providing International connectivity to the Network operated by foreign carriers.
23	Installation charges	Charges for installation of customer terminal equipment
24	Interconnection charges	A 'charge' levied by network operators on other service providers to recover the costs of the interconnection facilities (including the hardware and software for routing, signaling, and other basic service functions) provided by the network operators.
25	Internet Services	Internet services provides for accessing, using, or participating in the Internet
26	Internet Telephony	Internet telephony offers digital telecommunications services based on Voice over Internet Protocol (VoIP) that are provisioned via the Internet
27	IOT	Inter Operator traffic
28	IP-I	Infrastructure provider category- I -No license is issued for IP-I. Companies registered as IP-I can provide assets such as Dark Fibre, Right of Way, Duct space and Tower.
29	IP-II	Infrastructure provider category- II - An IP-II license can lease / rent out /sell end to end bandwidth i.e. digital transmission capacity capable to carry a message. Issuance of IP-II License has been discontinued w.e.f. 14.12.05.
30	ISP	Internet Service Provider
31	ISP (IT)	Internet Service Provider (including Internet Telephony)
32	IUC	Interconnection Usage Charges as defined at serial 24.
33	License Fee	The Licensee shall pay Licence Fee as a percentage of Adjusted Gross Revenue (AGR) for providing telecom services on basis of licenses granted by DoT.
34	LSAs	Licensed Service Areas (Circle)
35	Microwave Access	Microwave (MW) Access is normally in the frequency band 10 GHz and beyond for GSM and CDMA based telecom service providers
36	Microwave Backbone	Microwave (MW) Backbone networks are generally below 10 GHz frequency band for GSM and CDMA based telecom service providers
37	MoC&IT	Ministry of Communications and IT
38	NLD	National Long Distance - National Long Distance (NLD) service refers to the carriage of switched-bearer telecommunications services over a long distance network i.e., a network connecting different short distance charging areas (SDCAs)
39	NTP-94	National Telecom Policy-1994
40	NTP-99	New Telecom Policy-1999
41	OPEX	Operating Expenditure
42	PSPs	Private Service Providers
43	PSTN charges	Public Switched Telecom Network charges
44	Revenue sharing regime	New Telecom Policy - 99 introduced the 'Revenue Share Regime' in which telecom service providers, in place of the fixed license fee were required to pay a percentage of their Adjusted Gross Revenue (AGR) as licence fee
45	Roaming charges	Roaming is the ability for a cellular customer to automatically make & receive voice calls, send & receive data, or access other services when traveling outside the geographical coverage area of the home network, by means of using a visited network. The charges for this facility is Roaming charges

46	Sales Tax	Sales tax is a consumption tax imposed by the government on the sale of goods and services
47	Service Tax	Service tax is a tax levied by the government on service providers on certain service transactions, but is actually borne by the customers. It is categorized under Indirect Tax and came into existence under the Finance Act, 1994
48	SUC	Spectrum Usage Charges - In addition to License Fee, wireless service providers are required to pay Spectrum Usage Charges as a percentage of AGR.
49	Supplementary services	GSM offers three basic types of services: Telephony services or teleservices, Data services or bearer services & Supplementary services. Supplementary services are additional services that are provided in addition to teleservices and bearer services. These services include caller identification, call forwarding, call hold, call waiting, conferencing, number identification, closed user group and barring of outgoing (international) calls
50	ТВ	Trial Balance
51	TDSAT	Telecom Disputes Settlement and Appellate Tribunal
52	Terminal equipment	A device that constitutes a point of termination of a communications circuit or channel. Terminal equipment includes all customer premises equipment (CPE), including voice terminal equipment and data terminal equipment (DTE)
53	TRAI	Telecom Regulatory Authority of India
54	UASL	Unified Access Services License - The UASL services cover collection, carriage, transmission and delivery of voice and/or non-voice messages over licensee's network in the designated service area and include provision of all types of access services. Access Service Provider can also provide Internet Telephony, Internet Services and Broadband Services. If required, access service provider can use the network of NLD/ILD service licensee. The access service includes but not limited to wireline and / or wireless and fixed wireless access.
55	UL	Unified License - The Licensee may establish, operate and maintain Telecommunication Networks and telecommunication services using any technology as per prescribed standards in the service area as per scope of services authorized under this License. In case, the Licensee obtains Access Spectrum, the terms and conditions of the allotment of spectrum regarding use of technology shall be applicable.
56	USO	Universal Service Obligation - NTP'99 provided that the resources for meeting the USO would be raised through a 'Universal Access Levy (UAL)', which would be a percentage of the revenue earned by the operators under various licenses.
57	Value added services	Value-added service (VAS) is a popular telecommunications industry term for non-core services, or in short, all services beyond standard voice calls and fax transmissions. In the telecommunication industry, on a conceptual level, value-added services add value to the standard service.
58	VSAT	Very Small Aperture Terminal - VSAT License is to establish, install, operate and maintain VSAT Closed Users Group Domestic Data Network service via INSAT Satellite System on non- exclusive basis within territorial boundary of India.
59	WFD	Wireless Finance Division of DoT
60	WLL (M)	Wireless in Local Loop (Mobile)
61	WPC Charges	Charges levied by the Wireless Planning & Coordination Wing of DoT
